

# Alphabet/Google A-Z

*This document was created as a labour of love (and personal challenge!) to support a presentation I created many years about the use of Google products in Education — at a time when Google Apps was just starting to gain in popularity.*

*I have attempted to keep it up to date as I learn about new content, but sadly, Google seems to think this document contains inappropriate content and keeps flagging it. Originally this wasn't such a problem as it only restricted me from sharing the document with others, but lately the document has been blocked from even being viewed at all.*

This item has been flagged as inappropriate and can no longer be shared. [Request a review](#) [Dismiss](#)

*To get around this I am going to start keeping my GitHub copy of the document up-to-date and will share it from there, at least until I can successfully get the document reviewed and unflagged as including inappropriate content.*

*Anything missing? Contact me at [pbeens@gmail.com](mailto:pbeens@gmail.com) or [@pbeens](https://twitter.com/pbeens). Thanks! ~Peter*
